Prerequisite Course Guide for Community and Technical College Registered Nurse (RN) Programs in Washington State Nursing
(Based on website review) Last updated: 5.20.2024
For a complete list of Washington State Board of Nursing-approved nursing programs visit, https://nursingcare.gov/education/nursing/education-programs/approved-nursing-education-programs, and click on "Nursing programs in Washington (PDF)".

Spreadsheet Notes
• This spreadsheet was created to be a general guide to support potential nursing students. In mapping out their nursing education. It is reviewed and updated twice a year (generally in late spring and mid-fall) and may not contain the most up-to-date information. For the most up-to-date information on each program, you must visit the program website.
• Nursing programs have additional requirements to apply. These requirements can vary from programs to program. Be sure to carefully review the application requirements for any program you want to apply to.
General admission requirements may include the following: You must be admitted to and off-campus placements. Visit the program website for more detailed information.
- Minimum GPA (usually 2.5 or higher) in prerequisite courses. Some programs require a specific Pre-Nursing or TEAS Test score. See the program website for more detailed information.
- An active, unencumbered Washington State Licensed Practical Nurse (LPN) license.
- Proof of current immunization status. Vaccinations must be up-to-date and current.
- A background check performed by the Washington State Patrol and with a "No Record On File" report with the Department of Social and Health Services. (All nursing students are required to complete a background check. The background check is usually completed through the nursing program once you applying to.)
- Current CPR certification through CPR for the Health Care Provider. This includes adult, child, and infant, under the guidelines of the American Heart Association. Online CPR courses are not accepted.
- Students can be required to carry personal "need (N) medical insurance throughout their clinical rotations.
• College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the the college-level nursing prerequisite courses. Listed on this spreadsheet. Students may need to complete additional prerequisite coursework if they do not yet qualify to register for these college-level courses.

Schools Highlighted in Blue have
DTA/MRP program options (Direct Transfer Agreement/Major Related Program)

• Programs in a blue box offer Direct Transfer Agreements (DTA).
• Completion of the DTA/MRP program will satisfy requirements for direct transfer with only one additional year of study to complete the Bachelor of Science in Nursing (BSN) degree at four-year institutions in Washington State.
• A transcript evaluation process for all courses taken at another institution must be completed by the program being applied to.
• This spreadsheet does not guarantee a prerequisite course taken at one institution will be accepted at another institution.
• Always double-check the college requirements with any other school to ensure they accept the direct transfer agreement.
• It is highly recommended (and often required) that students meet with an academic advisor or counselor to ensure the college they choose does not have additional requirements.

• Courses highlighted in yellow are considered core prerequisite courses for most (but not all) programs.

"Planning prerequisite courses can be complicated. Without all of the information or a plan, you risk wasting your time and money. After attending an information session schedule an appointment with an academic adviser to help you develop a plan that is right for you. Use the following questions to help guide your discussion."
