provide more equitable & effective care by exploring the crucial			Cultivating Cultural Humility in Nursing: Practical tools for equitable and inclusive patient care
Track II AdvancedRobin Narruhn, PhD, MN, RN & Christine Espina, DNP, MN, RNconcepts of structural competency & cultural safety. Participants will learn to define structural competency & identify how social & political structures influence patient health and the clinical encounter. We will delve into cultural safety as a framework for nursing practice, moving beyond cultural competency to understand power dynamics & historical context. Through case studies & group discussion, participants will generate practical strategies for culturally safe nursing practice & develop responses addressing structures' impact on their patients' lives.			provide more equitable & effective care by exploring the crucial concepts of structural competency & cultural safety.
